

# PIXIL Thin Client

## ➤ WHAT IS IT?

- A complete software solution allowing thin client access to applications running on Windows servers, UNIX/Linux, IBM mainframe and midrange systems.
- Total solution bundled with Dell PC hardware replaces standalone thin client terminals with faster hardware, lower cost and more capabilities.
- Available for Dell Optiplex GX620, GX520, SX280, GX280 and 170L PCs.

## ➤ WHY BUY ONE?

- Lowest-cost complete Dell hardware+software solution on the market
- Network boot reduces overall hardware costs, simplifies management
- No local storage requirement means high security, centralized configurations
- Low-cost N-series Optiplex hardware can be dual-deployed as desktop PCs
- Fast CPU allows delivery of very high quality audio and video to the desktop
- Uses the powerful embedded Linux operating system

## ➤ TECH SPECS

- ICA 8 protocol access to Citrix WinFrame, MetaFrame and nFuse
- RDP 5 protocol access to Microsoft Windows 2003 Server
- X11 protocol access to UNIX/Linux X Window Servers
- Local audio, video and printer support for Citrix and RDP Windows applications
- Local hardware support for USB, 10/100 Gigabit ethernet and 24-bit color
- IBM TN3270E terminal emulation for IBM mainframe access
- IBM 5250E terminal emulation for IBM AS/400 access
- DEC VT220 terminal emulation for UNIX/Linux access
- Graphical user interface for network login and user configuration
- Configurable remotely or locally individually or by groups of systems
- Optional local browser support using Firefox 1.0, HTML 4.0
- SDK available for Linux image and filesystem customization

## ➤ COMPETITIVE ADVANTAGE

- Uses standard low-cost N-series OptiPlex hardware, no local storage
- Supports multiple boot options – Network PXE boot, local boot from USB flash, CD, HD or FD, only 128MB RAM required
- Easily administered from single management console
- Works with organization's existing software management systems

## ➤ IDEAL FOR

- New and current thin client users using Citrix or Microsoft Terminal Server
- Large organizations wanting to reduce IT management costs and centralize deployment of all applications to servers
- Replacement of existing Wyse or HP thin client hardware at lower cost
